

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A container ~~(1)~~ comprising:
walls ~~(2-6)~~ defining an inside zone ~~(7)~~ ~~suited for housing~~ at least one piece of equipment~~(8)~~,
wherein at least one of said walls ~~(2-6)~~ ~~being constituted comprising by:~~
at least three sub-walls~~(9-11)~~ spaced apart from one another in such a manner as to define at least first and second air circulation spaces, said first and second circulation spaces being separated without any communication therebetween ~~(12, 13)~~,
wherein said first space ~~(12)~~ communicating with the outside of said container via at least two outside openings~~(14-16)~~, and said second space ~~(13)~~ communicating with said inside zone ~~(7)~~ via at least two openings,
wherein a first one of said sub-walls ~~(9)~~ ~~facings~~ faces the outside of said container,
wherein a second one of said sub-walls ~~(10)~~ ~~facings~~ faces said inside zone, and
wherein a third one of said sub-walls ~~(11)~~ ~~being is~~ is interposed between said first and second sub-walls, and said third one of said sub-walls sealingly separates said first and second circulation spaces so that air inside said container does not contact air outside said container ~~(9, 10)~~, and
wherein the container being characterized in that said first sub-wall ~~(9)~~ is formed from is constituted by a thermally insulating material.

2. (currently amended): A-The container according to claim 1, ~~in which~~ wherein said third sub-wall (11) ~~is constituted~~ formed from ~~by~~ a material ~~for enabling heat to be transferred between said first and second spaces (12, 13).~~

3. (currently amended): A-The container according to claim 1, ~~in which~~ wherein said second sub-wall (9) ~~is formed from~~ constituted by a thermally insulating material.

4. (currently amended): A-The container according to claim 1, further comprising ~~including~~ at least a first air circulator device (20) ~~arranged to suck in air from outside said container via at least a first one of said outside openings (14, 15), to cause said outside air to circulate in said first space (12), and then to expel said outside air through at least a second one~~ of ~~of~~ said outside openings (16).

5. (currently amended): A-The container according to claim 4, ~~in which~~ wherein at least a portion of said air circulator device (20) ~~is installed substantially in said second outside opening (16).~~

6. (currently amended): A-The container according to claim 4, ~~in which~~ wherein said first air circulator device (20) ~~comprises at least one fan.~~

7. (currently amended): A-The container according to claim 4, ~~including~~ further comprising at least one second air circulator device (21) ~~arranged to suck air in from said inside zone (7) via at least one of said first inside openings (17), to cause said inside air to circulate in~~

said second space(13), and then to expel said inside air through at least a second one of said inside openings(18, 19).

8. (currently amended): ~~A-The~~ container according to claim 7, ~~in which wherein~~ at least a portion ~~at least~~ of said second air circulator device (21) is installed substantially in said second inside opening(17).

9. (currently amended): ~~A-The~~ container according to claim 7, ~~in which wherein~~ said second air circulator device (21) comprises at least one fan.

10. (currently amended): ~~A-The~~ container according to claim 7-4, further comprising ~~including~~ a control device (22) arranged to control the operation of at least one of said first air circulator device (20) and/or of said second air circulator device (21).

11. (currently amended): ~~A-The~~ container according to claim 10, ~~in which wherein~~ said control device (22) is arranged to control the operation of at least one of said first air circulator device (20) and/or of said second air circulator device (21) in such a manner as to regulate the temperature in said inside zone(7).

12. (currently amended): ~~A-The~~ container according to claim 1, ~~in which wherein~~ the direction of air circulation in said first space (42) is substantially opposite to the direction of air circulation in said second space(13).

13. (currently amended): ~~A-The~~ container according to claim 1, ~~wherein in which each of~~
at least three of its walls of said container ~~(2, 3, 6) are constituted~~ comprise by said at least three
sub-walls~~(9-11)~~.

14. (currently amended): ~~A-The~~ container according to claim 13, ~~in which wherein~~ said at
least three walls ~~(2, 3, 6)~~ communicate with one another in such a manner as to ~~constitute~~
comprise a single-shaped element.

15. (currently amended): ~~A-The~~ container according to claim 13, ~~in which wherein~~ one
of said at least three walls ~~(2, 3, 6)~~ is a top wall~~(6)~~.

16. (currently amended): A telephone system including a container according to claim 1
housing telephone equipment~~(8)~~.
